To whom it may concern:

**Experience with Mr Francois Swanepoel from Fusion BIM:**

My son had completed his BArch degree at UCT and wanted to improve his portfolio to apply for continuing with his Honours and Masters studies.

I needed advice on the best computer to buy and after finding Francois on the internet he proved invaluable on referring us with the necessary specs to a suitable laptop supplier.

Francois then also offered a course in training my son in Archicad which enabled him to finish his portfolio's last project.

Francois was also available afterwards in helping my son with the finer applications in Archicad as well as the rendering of the last project. He did this within a busy schedule early in the mornings and even late at night.

He surely has gone beyond the call of duty and subsequently Hanno was accepted to continue his studies at UCT.

I can recommend Francois and his business and wish him well .

Dr Marius Coetsee
